

Detailed screening report

Built from the saved results JSON. This file does not rescore the resumes.

Batch

total	parsed	eligible	rejected	failed
50	50	33	17	0

Model: No model key was set. Every eligible row is llm_status: skipped.

GitHub: checked 14, scored 13, failed 1.

ARUNIMA SAHA, PRAJWAL A S, and Yash Maini are tied at 80.

Rejected

Neither Python nor an AI project

File	Name	Notes
candidate_46.pdf	AABHAR GUPTA	
candidate_42.pdf	ANJALI PATIL	
candidate_18.pdf	Harshit Kumar Mishra	
candidate_01.pdf	Kartikay Sinha	
candidate_02.pdf	SHIVAM RAJ	

Python, no AI project

File	Name	Notes
candidate_03.pdf	Agam Jain	FastAPI, PostgreSQL, Redis
candidate_20.pdf	-	
candidate_27.pdf	Gayathri Palraj	
candidate_14.pdf	JAYA NANDI	
candidate_48.pdf	NIDHI KM	
candidate_34.pdf	NISARGA H. S.	
candidate_45.pdf	Parshuram Kumar	Redis
candidate_31.pdf	Shreya Chauhan	Redis
candidate_05.pdf	VISHWAS BADIGER	
candidate_04.pdf	Yuvaraj R	PostgreSQL

AI project, no Python

File	Name	Notes
candidate_11.pdf	MD AZIZUL ISLAM	RAG, embeddings, vector search, OpenAI, LLM

File	Name	Notes
candidate_32.pdf	Mukul Pal	OpenAI, LLM

Ranking

Rank	Score	Name	File
1	80	ARUNIMA SAHA	candidate_43.pdf
2	80	PRAJWAL A S	candidate_22.pdf
3	80	Yash Maini	candidate_13.pdf
4	74	Prathamesh Patil	candidate_35.pdf

26	47	KRISHAN KANT	candidate_09.pdf
27	46	Vivek Shekhawat	candidate_39.pdf
28	43	VIKRAM MADHYASTA	candidate_29.pdf
29	40	MANOJ KUMAR K R	candidate_21.pdf
30	38	Aswin Raj R	candidate_49.pdf
31	35	M SAI KUSHITH	candidate_06.pdf
32	24	DORNIPADU KARTHIKA CHAITRIKA	candidate_24.pdf
33	22	Atul Kumar Dehradun	candidate_25.pdf

Eligible resumes

1. ARUNIMA SAHA

candidate_43.pdf arunimasaha11@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	40	40	AI project evidence: LangChain, LangGraph, RAG, vector search, Pinecone, tool calling, multi-agent, agent, OpenAI, Gen AI, LLM (+16); retrieval (+6); tool calling (+6); state (+4); orchestration (+6); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	15	15	GCP in project/work (+6); Docker in project/work (+5); deployment in project/work (+4)
GitHub	0	10	No GitHub profile on resume
Engineering depth	1	5	Engineering signals: observability
Total	80	100	

Skills: Python, FastAPI, PostgreSQL, Docker, GCP, LangChain, LangGraph, RAG, embeddings, vector search, Pinecone, tool calling, multi-agent, agent, OpenAI, Gen AI, LLM, transformers

Summary: Deterministic read: AI depth 40/40, Python backend 24/30, cloud 15/15, engineering 1/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

2. PRAJWAL A S

candidate_22.pdf prajwalas8999@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	38	40	AI project evidence: LangChain, LangGraph, RAG, vector search, tool calling, multi-agent, agent, LLM (+16); retrieval (+6); tool calling (+6); orchestration (+6); backend logic (+4)
Python / backend	28	30	Python in project/work (+12); FastAPI in project/work (+8); async in project/work (+4); PostgreSQL in project/work (+4)
Cloud / full stack	7	15	deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	5	10	0 push events in the last 90 days (+0), 5 relevant public repos updated in 180 days (+5).
Engineering depth	2	5	Engineering signals: architecture, observability
Total	80	100	

Skills: Python, FastAPI, async, PostgreSQL, React, LangChain, LangGraph, RAG, embeddings, vector search, tool calling, multi-agent, agent, Gen AI, LLM, JavaScript

Summary: Deterministic read: AI depth 38/40, Python backend 28/30, cloud 7/15, engineering 2/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 5 relevant public repos updated in 180 days (+5).

3. Yash Maini

candidate_13.pdf mainiyash2@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangGraph, tool calling, agent, OpenAI, Gen AI, LLM (+16); tool calling (+6); orchestration (+6); backend logic (+4)
Python / backend	28	30	Python in project/work (+12); FastAPI in project/work (+8); async in project/work (+4); PostgreSQL in project/work (+4)
Cloud / full stack	11	15	GCP on a skills list (+2); Docker in project/work (+5); deployment in project/work (+4)
GitHub	6	10	2 push events in the last 90 days (+2), 2 relevant public repos updated in 180 days (+4).
Engineering depth	3	5	Engineering signals: observability, concurrency, failure handling
Total	80	100	

Skills: Python, FastAPI, async, PostgreSQL, Docker, GCP, LangChain, LangGraph, RAG, embeddings, vector search, FAISS, Pinecone, tool calling, multi-agent, agent, OpenAI, Gen AI, LLM

Summary: Deterministic read: AI depth 32/40, Python backend 28/30, cloud 11/15, engineering 3/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 2 push events in the last 90 days (+2), 2 relevant public repos updated in 180 days (+4).

4. Prathamesh Patil

candidate_35.pdf prathameshpatil330@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangGraph, RAG, embeddings, vector search, Chroma, multi-agent, agent, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	26	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4); Redis in project/work (+2)
Cloud / full stack	12	15	Docker in project/work (+5); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	4	5	Engineering signals: testing, caching, queues, observability
Total	74	100	

Skills: Python, FastAPI, PostgreSQL, Redis, Docker, React, Next.js, LangGraph, RAG, embeddings, vector search, Chroma, multi-agent, agent, LLM, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 26/30, cloud 12/15, engineering 4/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

5. Sumaiya Sultana Shaik

candidate_28.pdf sultanasumaiya623@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, RAG, multi-agent, agent, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	15	15	GCP in project/work (+6); Docker in project/work (+5); deployment on a skills list (+1); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	3	5	Engineering signals: testing, architecture, failure handling
Total	74	100	

Skills: Python, FastAPI, PostgreSQL, Docker, GCP, React, LangChain, LangGraph, RAG, multi-agent, agent, LLM, Java

Summary: Deterministic read: AI depth 32/40, Python backend 24/30, cloud 15/15, engineering 3/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

6. Aditi Kala

candidate_37.pdf aditi25.kala@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: agent, LLM (+16); orchestration (+6); backend logic (+4)
Python / backend	21	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL on a skills list (+1)
Cloud / full stack	14	15	GCP in project/work (+6); Docker in project/work (+5); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	10	10	67 push events in the last 90 days (+5), 9 relevant public repos updated in 180 days (+5).
Engineering depth	2	5	Engineering signals: testing, concurrency
Total	73	100	

Skills: Python, FastAPI, PostgreSQL, Docker, GCP, React, Next.js, agent, LLM, Java, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 21/30, cloud 14/15, engineering 2/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 67 push events in the last 90 days (+5), 9 relevant public repos updated in 180 days (+5).

7. Arjun Kumar

candidate_08.pdf roy.prajapat.143@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, LangGraph, embeddings, transformers (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	28	30	Python in project/work (+12); FastAPI in project/work (+8); async in project/work (+4); PostgreSQL in project/work (+4)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	7	10	2 push events in the last 90 days (+2), 5 relevant public repos updated in 180 days (+5).
Engineering depth	2	5	Engineering signals: queues, concurrency
Total	72	100	

Skills: Python, FastAPI, async, PostgreSQL, React, Next.js, LangChain, LangGraph, RAG, embeddings, Gen AI, LLM, Hugging Face, transformers, Java, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 28/30, cloud 3/15, engineering 2/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 2 push events in the last 90 days (+2), 5 relevant public repos updated in 180 days (+5).

8. Hari Shanker Sharma

candidate_41.pdf harishankersharmate648@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, RAG, agent, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	23	30	Python in project/work (+12); FastAPI in project/work (+8); async on a skills list (+1); PostgreSQL on a skills list (+1); Redis on a skills list (+1)
Cloud / full stack	12	15	Docker in project/work (+5); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	3	5	Engineering signals: testing, architecture, observability
Total	70	100	

Skills: Python, FastAPI, async, PostgreSQL, Redis, Docker, React, Next.js, LangChain, LangGraph, RAG, embeddings, vector search, tool calling, agent, LLM, Hugging Face, Java, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 23/30, cloud 12/15, engineering 3/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

9. V Sree Raghu Vardhan

candidate_30.pdf vardhanvsr2004@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, RAG, embeddings, agent, OpenAI, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); async on a skills list (+1); PostgreSQL on a skills list (+1); Redis in project/work (+2)
Cloud / full stack	9	15	Docker on a skills list (+2); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	5	5	Engineering signals: testing, architecture, caching, concurrency, failure handling
Total	70	100	

Skills: Python, FastAPI, async, PostgreSQL, Redis, Docker, React, LangChain, LangGraph, RAG, embeddings, vector search, Pinecone, agent, OpenAI, LLM, Java, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 24/30, cloud 9/15, engineering 5/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

10. ABHINAV MISHRA

candidate_10.pdf abhinavmishra3322@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: LangGraph, agent, OpenAI (+16); orchestration (+6); backend logic (+4)
Python / backend	26	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4); Redis in project/work (+2)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	10	10	37 push events in the last 90 days (+5), 4 relevant public repos updated in 180 days (+5).
Engineering depth	4	5	Engineering signals: testing, caching, observability, failure handling
Total	69	100	

Skills: Python, FastAPI, PostgreSQL, Redis, React, Next.js, LangGraph, RAG, agent, OpenAI, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 26/30, cloud 3/15, engineering 4/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 37 push events in the last 90 days (+5), 4 relevant public repos updated in 180 days (+5).

11. Nevil Jasmin Mehta

candidate_50.pdf nevilmehta5@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: RAG, embeddings, vector search, LLM, transformers (+16); retrieval (+6); backend logic (+4)
Python / backend	30	30	Python in project/work (+12); FastAPI in project/work (+8); async in project/work (+4); PostgreSQL in project/work (+4); Redis in project/work (+2)
Cloud / full stack	9	15	Docker on a skills list (+2); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	2	5	Engineering signals: architecture, queues
Total	67	100	

Skills: Python, FastAPI, async, PostgreSQL, Redis, Docker, React, RAG, embeddings, vector search, LLM, transformers, Java, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 30/30, cloud 9/15, engineering 2/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

12. Vaibhav Wakde

candidate_33.pdf wakde266@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	38	40	AI project evidence: LangChain, LangGraph, LlamaIndex, RAG, embeddings, tool calling, agent, LLM, Hugging Face (+16); retrieval (+6); tool calling (+6); orchestration (+6); backend logic (+4)
Python / backend	21	30	Python in project/work (+12); FastAPI in project/work (+8); async on a skills list (+1)
Cloud / full stack	6	15	Docker on a skills list (+2); deployment in project/work (+4)
GitHub	0	10	No GitHub profile on resume
Engineering depth	1	5	Engineering signals: caching
Total	66	100	

Skills: Python, FastAPI, async, Docker, LangChain, LangGraph, LlamaIndex, RAG, embeddings, Chroma, tool calling, agent, OpenAI, LLM, Hugging Face, transformers, JavaScript

Summary: Deterministic read: AI depth 38/40, Python backend 21/30, cloud 6/15, engineering 1/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

13. Jyandeep Baishya

candidate_07.pdf craftzyan@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	38	40	AI project evidence: LangGraph, RAG, Chroma, tool calling, multi-agent, agent, LLM (+16); retrieval (+6); tool calling (+6); orchestration (+6); backend logic (+4)
Python / backend	22	30	Python in project/work (+12); FastAPI in project/work (+8); Redis in project/work (+2)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	2	5	Engineering signals: architecture, caching
Total	65	100	

Skills: Python, FastAPI, Redis, React, Next.js, LangChain, LangGraph, RAG, Chroma, tool calling, multi-agent, agent, LLM, JavaScript

Summary: Deterministic read: AI depth 38/40, Python backend 22/30, cloud 3/15, engineering 2/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

14. PRIYANSHU KUMAR

candidate_16.pdf krpriyanshu2805@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	38	40	AI project evidence: LangGraph, RAG, embeddings, Pinecone, tool calling, multi-agent, agent, LLM (+16); retrieval (+6); tool calling (+6); orchestration (+6); backend logic (+4)
Python / backend	18	30	Python on a skills list (+6); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	7	15	deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	2	5	Engineering signals: architecture, queues
Total	65	100	

Skills: Python, FastAPI, PostgreSQL, React, LangChain, LangGraph, RAG, embeddings, vector search, Pinecone, tool calling, multi-agent, agent, LLM, JavaScript

Summary: Deterministic read: AI depth 38/40, Python backend 18/30, cloud 7/15, engineering 2/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

15. Kiran Naregal

candidate_47.pdf kirnaregal7@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, LangGraph, RAG, multi-agent, agent, OpenAI, LLM, Hugging Face (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	20	30	Python in project/work (+12); FastAPI in project/work (+8)
Cloud / full stack	9	15	Docker on a skills list (+2); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	2	10	0 push events in the last 90 days (+0), 1 relevant public repos updated in 180 days (+2).
Engineering depth	1	5	Engineering signals: architecture
Total	64	100	

Skills: Python, FastAPI, Docker, React, Next.js, LangChain, LangGraph, RAG, multi-agent, agent, OpenAI, LLM, Hugging Face, transformers, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 20/30, cloud 9/15, engineering 1/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 1 relevant public repos updated in 180 days (+2).

16. PAVANI A

candidate_38.pdf pavani10112004@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	20	40	AI project evidence: LLM (+16); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	8	15	Docker in project/work (+5); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	10	10	29 push events in the last 90 days (+5), 5 relevant public repos updated in 180 days (+5).
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	62	100	

Skills: Python, FastAPI, PostgreSQL, Docker, React, Next.js, LLM, Java, JavaScript

Summary: Deterministic read: AI depth 20/40, Python backend 24/30, cloud 8/15, engineering 0/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence

Concerns: No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 29 push events in the last 90 days (+5), 5 relevant public repos updated in 180 days (+5).

17. RAJ THUMAR

candidate_40.pdf thummaraj999@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: RAG, OpenAI, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	18	30	Python in project/work (+12); PostgreSQL in project/work (+4); Redis in project/work (+2)
Cloud / full stack	5	15	Docker on a skills list (+2); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	5	5	Engineering signals: architecture, caching, queues, observability, failure handling
Total	60	100	

Skills: Python, PostgreSQL, Redis, Docker, React, RAG, OpenAI, LLM, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 18/30, cloud 5/15, engineering 5/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

18. Vivek Chimnani

candidate_44.pdf vivekchimnani4231@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: LangGraph, LLM (+16); orchestration (+6); backend logic (+4)
Python / backend	20	30	Python on a skills list (+6); FastAPI in project/work (+8); PostgreSQL in project/work (+4); Redis in project/work (+2)
Cloud / full stack	8	15	Docker in project/work (+5); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	2	10	0 push events in the last 90 days (+0), 1 relevant public repos updated in 180 days (+2).
Engineering depth	4	5	Engineering signals: architecture, queues, observability, concurrency
Total	60	100	

Skills: Python, FastAPI, PostgreSQL, Redis, Docker, React, Next.js, LangGraph, agent, LLM, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 20/30, cloud 8/15, engineering 4/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 1 relevant public repos updated in 180 days (+2).

19. HARSHA A

candidate_15.pdf harshaarun2608@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: embeddings, vector search (+16); retrieval (+6); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	8	15	Docker in project/work (+5); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	58	100	

Skills: Python, FastAPI, PostgreSQL, Docker, React, embeddings, vector search, Gen AI, Java, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 24/30, cloud 8/15, engineering 0/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence

Concerns: No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

20. SHUBHANSHU NAVADIYA

candidate_12.pdf subhnavadiya@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, LlamaIndex, RAG, multi-agent, agent, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)
Python / backend	20	30	Python in project/work (+12); FastAPI in project/work (+8)
Cloud / full stack	4	15	deployment in project/work (+4)
GitHub	0	10	No GitHub profile on resume
Engineering depth	1	5	Engineering signals: testing
Total	57	100	

Skills: Python, FastAPI, LangChain, LlamaIndex, RAG, embeddings, multi-agent, agent, OpenAI, Gen AI, LLM, Hugging Face, transformers

Summary: Deterministic read: AI depth 32/40, Python backend 20/30, cloud 4/15, engineering 1/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Python backend evidence in a project or internship

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

21. Gourab Das

candidate_17.pdf gourabdas1307@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	20	40	AI project evidence: agent (+16); backend logic (+4)
Python / backend	19	30	Python on a skills list (+6); FastAPI in project/work (+8); PostgreSQL in project/work (+4); Redis on a skills list (+1)
Cloud / full stack	12	15	Docker in project/work (+5); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	2	10	1 push events in the last 90 days (+2), 0 relevant public repos updated in 180 days (+0).
Engineering depth	2	5	Engineering signals: testing, concurrency
Total	55	100	

Skills: Python, FastAPI, PostgreSQL, Redis, Docker, React, LangChain, LangGraph, RAG, agent, Java, Spring Boot

Summary: Deterministic read: AI depth 20/40, Python backend 19/30, cloud 12/15, engineering 2/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship; Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 1 push events in the last 90 days (+2), 0 relevant public repos updated in 180 days (+0).

22. Thejeshwaar Paasila

candidate_26.pdf thejeshwaarp@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: OpenAI, Gen AI (+16); orchestration (+6); backend logic (+4)
Python / backend	16	30	Python in project/work (+12); PostgreSQL in project/work (+4)
Cloud / full stack	11	15	GCP on a skills list (+2); Docker on a skills list (+2); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	0 push events in the last 90 days (+0), 0 relevant public repos updated in 180 days (+0).
Engineering depth	1	5	Engineering signals: concurrency
Total	54	100	

Skills: Python, PostgreSQL, Docker, GCP, React, Next.js, RAG, OpenAI, Gen AI, LLM, Hugging Face, transformers, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 16/30, cloud 11/15, engineering 1/5. GitHub is scored separately.

Strengths: Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 0 relevant public repos updated in 180 days (+0).

23. ANNISHA S

candidate_23.pdf annishasaravanan83@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: LangGraph, OpenAI, LLM (+16); orchestration (+6); backend logic (+4)
Python / backend	24	30	Python in project/work (+12); FastAPI in project/work (+8); PostgreSQL in project/work (+4)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	GitHub enrichment failed (HTTP 404). Score left at 0.
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	53	100	

Skills: Python, FastAPI, PostgreSQL, React, LangGraph, OpenAI, LLM

Summary: Deterministic read: AI depth 26/40, Python backend 24/30, cloud 3/15, engineering 0/5. GitHub is scored separately.

Strengths: Python backend evidence in a project or internship

Concerns: No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: failed GitHub enrichment failed (HTTP 404). Score left at 0.

24. P.V. Jayavardhana Sai

candidate_19.pdf pvjayavardhan6@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	28	40	AI project evidence: RAG, LLM, transformers (+16); retrieval (+6); orchestration (+6)
Python / backend	12	30	Python in project/work (+12)
Cloud / full stack	9	15	Docker on a skills list (+2); deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	49	100	

Skills: Python, Docker, React, RAG, agent, Gen AI, LLM, transformers, Java, JavaScript

Summary: Deterministic read: AI depth 28/40, Python backend 12/30, cloud 9/15, engineering 0/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text; Cloud or deployment evidence

Concerns: No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

25. Saif Ali Nagori

candidate_36.pdf saifalinagori78@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: RAG, LLM (+16); retrieval (+6); backend logic (+4)
Python / backend	9	30	Python on a skills list (+6); FastAPI on a skills list (+3)
Cloud / full stack	7	15	deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	6	10	1 push events in the last 90 days (+2), 2 relevant public repos updated in 180 days (+4).
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	48	100	

Skills: Python, FastAPI, React, RAG, LLM, JavaScript

Summary: Deterministic read: AI depth 26/40, Python backend 9/30, cloud 7/15, engineering 0/5. GitHub is scored separately.

Concerns: Thin Python backend evidence; No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 1 push events in the last 90 days (+2), 2 relevant public repos updated in 180 days (+4).

26. KRISHAN KANT

candidate_09.pdf krishankantptu@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	20	40	AI project evidence: OpenAI, LLM (+16); backend logic (+4)
Python / backend	15	30	Python on a skills list (+6); async in project/work (+4); PostgreSQL in project/work (+4); Redis on a skills list (+1)
Cloud / full stack	8	15	Docker in project/work (+5); React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	4	5	Engineering signals: architecture, observability, concurrency, failure handling
Total	47	100	

Skills: Python, async, PostgreSQL, Redis, Docker, React, LangChain, RAG, vector search, OpenAI, Gen AI, LLM, Java, JavaScript, Spring Boot

Summary: Deterministic read: AI depth 20/40, Python backend 15/30, cloud 8/15, engineering 4/5. GitHub is scored separately.

Strengths: Cloud or deployment evidence; Several engineering-depth signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

27. Vivek Shekhawat

candidate_39.pdf vivekshekhawatofficial1592002@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	32	40	AI project evidence: LangChain, LangGraph, RAG, embeddings, vector search, LLM (+16); retrieval (+6); orchestration (+6); backend logic (+4)

Category	Points	Cap	Evidence
Python / backend	10	30	Python on a skills list (+6); PostgreSQL in project/work (+4)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	0 push events in the last 90 days (+0), 0 relevant public repos updated in 180 days (+0).
Engineering depth	1	5	Engineering signals: concurrency
Total	46	100	

Skills: Python, PostgreSQL, React, Next.js, LangChain, LangGraph, RAG, embeddings, vector search, LLM, Java, JavaScript

Summary: Deterministic read: AI depth 32/40, Python backend 10/30, cloud 3/15, engineering 1/5. GitHub is scored separately.

Strengths: Strong AI project evidence in the resume text

Concerns: Thin Python backend evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 0 relevant public repos updated in 180 days (+0).

28. VIKRAM MADHYASTA

candidate_29.pdf vikrammadyasta@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	20	40	AI project evidence: OpenAI (+16); backend logic (+4)
Python / backend	12	30	Python in project/work (+12)
Cloud / full stack	9	15	Docker in project/work (+5); deployment in project/work (+4)
GitHub	0	10	No GitHub profile on resume
Engineering depth	2	5	Engineering signals: observability, concurrency
Total	43	100	

Skills: Python, Docker, OpenAI, Java

Summary: Deterministic read: AI depth 20/40, Python backend 12/30, cloud 9/15, engineering 2/5. GitHub is scored separately.

Strengths: Cloud or deployment evidence

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

29. MANOJ KUMAR K R

candidate_21.pdf manojkumar.k.r0904@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	20	40	AI project evidence: Hugging Face (+16); backend logic (+4)
Python / backend	12	30	Python in project/work (+12)
Cloud / full stack	7	15	deployment in project/work (+4); React or Next.js inside a system that also has backend or deploy evidence (+3)

Category	Points	Cap	Evidence
GitHub	0	10	No GitHub profile on resume
Engineering depth	1	5	Engineering signals: testing
Total	40	100	

Skills: Python, React, Hugging Face, Java

Summary: Deterministic read: AI depth 20/40, Python backend 12/30, cloud 7/15, engineering 1/5. GitHub is scored separately.

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

30. Aswin Raj R

candidate_49.pdf aswinraj12@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	26	40	AI project evidence: LangChain, RAG, OpenAI, Gen AI, LLM, transformers (+16); retrieval (+6); backend logic (+4)
Python / backend	12	30	Python in project/work (+12)
Cloud / full stack	0	15	No cloud, Docker, or deployment evidence
GitHub	0	10	No GitHub profile on resume
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	38	100	

Skills: Python, React, LangChain, RAG, OpenAI, Gen AI, LLM, transformers, Java, JavaScript, Spring Boot

Summary: Deterministic read: AI depth 26/40, Python backend 12/30, cloud 0/15, engineering 0/5. GitHub is scored separately.

Concerns: No cloud or deployment evidence; No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

31. M SAI KUSHITH

candidate_06.pdf msaikushith718@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	16	40	AI project evidence: LLM (+16); depth terms appear in the skills list, so the thin-wrapper penalty was not applied
Python / backend	16	30	Python in project/work (+12); FastAPI on a skills list (+3); PostgreSQL on a skills list (+1)
Cloud / full stack	3	15	React or Next.js inside a system that also has backend or deploy evidence (+3)
GitHub	0	10	No GitHub profile on resume
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	35	100	

Skills: Python, FastAPI, PostgreSQL, React, LangChain, LangGraph, RAG, vector search, LLM, Java

Summary: Deterministic read: AI depth 16/40, Python backend 16/30, cloud 3/15, engineering 0/5. GitHub is scored separately.

Concerns: No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume

32. DORNIPADU KARTHIKA CHAITRIKA

candidate_24.pdf dornipadukarthi@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	8	40	AI mentioned outside a project block: RAG, LLM (+8)
Python / backend	12	30	Python in project/work (+12)
Cloud / full stack	0	15	No cloud, Docker, or deployment evidence
GitHub	4	10	0 push events in the last 90 days (+0), 2 relevant public repos updated in 180 days (+4).
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	24	100	

Skills: Python, RAG, embeddings, Gen AI, LLM, JavaScript

Summary: Deterministic read: AI depth 8/40, Python backend 12/30, cloud 0/15, engineering 0/5. GitHub is scored separately.

Concerns: Limited AI project depth; No cloud or deployment evidence; No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: ok 0 push events in the last 90 days (+0), 2 relevant public repos updated in 180 days (+4).

33. Atul Kumar Dehradun

candidate_25.pdf atulofficial02@gmail.com

Category	Points	Cap	Evidence
AI / agentic / RAG	6	40	AI project evidence: transformers (+16); thin wrapper or keyword-only project (-10)
Python / backend	6	30	Python on a skills list (+6)
Cloud / full stack	10	15	GCP in project/work (+6); deployment in project/work (+4)
GitHub	0	10	No GitHub profile on resume
Engineering depth	0	5	No testing, architecture, caching, queue, observability, concurrency, or failure-handling evidence
Total	22	100	

Skills: Python, GCP, Gen AI, LLM, transformers

Summary: Deterministic read: AI depth 6/40, Python backend 6/30, cloud 10/15, engineering 0/5. GitHub is scored separately.

Strengths: Cloud or deployment evidence

Concerns: Limited AI project depth; Thin Python backend evidence; No testing, architecture, or reliability signals

Model: skipped No LLM_API_KEY or XAI_API_KEY set. Deterministic score kept.

GitHub: missing No GitHub profile on resume
